Step-by-step guide on how to study:

- 1. Understanding the Prompt (2 minutes):** Spend a couple of minutes carefully reading and understanding the prompt. Identify the main topic, the task you are asked to perform, and any specific instructions provided.
- 2. Brainstorming and Planning (5 minutes):** Use the remaining time to brainstorm ideas related to the prompt and outline your essay. Jot down key points, arguments, examples, and supporting details that you can include in your essay. Organize your thoughts logically to create a coherent structure for your response.
- 3. Writing (20 minutes):** Once you have a clear outline, start writing your essay. Aim to write an introduction that introduces the topic and presents your thesis statement, followed by body paragraphs that develop your ideas and support your arguments with relevant examples or evidence. Finally, write a conclusion that summarizes your main points and restates your opinion or position.
- 4. Reviewing and Editing (2-3 minutes, if time allows):** If you have time remaining, use it to review and edit your essay. Check for grammatical errors, clarity of expression, and coherence of ideas. Make any necessary revisions to improve the overall quality of your writing.
